**14 December 1984**

**MEMORANDUM FOR THE RECORD**

**SUBJECT: Outline for DCI Paper "US Dependence on Foreign  
Manufactures: National Security Implications"**

I discussed the paper yesterday with [REDACTED], OGI.  
I suggested they shift the focus of the paper to US requirements for  
foreign sourcing in three areas: component parts, machines for  
manufacturing defense items, and key technologies such as ceramics. The  
paper would note the geographic shift of foreign sourcing from Europe to  
Japan and speculate as to what this might mean for defense cooperation  
in the late 1980s and 1990s.
